## Chapter 1: Background

### 1.0 Introduction

Lesotho has a population of 2.2 million and is one of the smallest countries in Southern Africa. The Ministry of Education and Training (MoET) is tasked with managing a national education system with more than 350,000 students in over 1,800 institutions.

The Lesotho EMIS (Education Management information System) is envisaged to collect and aggregate data on institutions facilities, students and staff from schools in paper-based form and then entered centrally in a database developed for this purpose through yearly censuses.

Without good data and information the decisions made by education policy leaders can never be as effective and efficient as they need to be to meet the needs and requirements of learners and education institutions.

Addressing problems of access, equity, quality and relevance of education requires an evidence-based management system to monitor progress towards national goals and global commitments. It is also required for local and national education managers, policy and decision makers to effectively assess challenges and determine courses of action as well as gaps in education services as well as realistic assessments of resources required. An effective Education Management Information System (EMIS) is specially designed to monitor the performance of education systems and to manage the distribution and allocation of educational resources. It is designed to improve planning, resource allocation and mobilization, monitoring, evaluation, policy formulation, and decision making in general. A school-based standardized information system is fundamental to improve the management of education at all levels. Ideally the system should allow tracking of individual children across the grades. In the education management process, the information system should inform the different actors and partners on the state of the sector, its internal and external efficiency, its pedagogical and institutional operation, its performance, shortcomings and needs.

The EMIS has to be positioned and technologically integrated to the relevant data sources allowing to know, for example, who is spending what, or whether children are actually learning what they need to know, and with feasibility of data
disaggregation at the school or even the student level. These characteristics make an EMIS relevant for the policy planning and the management of education systems.

### 1.1.1 The Education System

The system of education in Lesotho prior to 2016 was starting with Pre-primary or kinder garden, the second level was elementary or primary school, Secondary education was the third level (which included junior and senior high school), postsecondary was the forth (vocational and technical schools, IBM,) then tertiary or Higher education was the fifth. In 2016 the basic education system was introduced. This combined the pre primary, primary, and lower secondary together. All things remained the same at these levels except that primary school leaving certificate was abolished, and a pupils only sit for examinations at the end of lower secondary schooling that is after seven years of primary schooling and three years of lover secondary education.

Pre-primary education or preparatory education, is intended to provide early childhood care and development education. These are institutions that have been developed for children ranging from the ages of three to five in Lesotho. The playing activities, experience, and social interaction at this level are accepted as essential aspects of developing skills and knowledge of a child. Few preparatory schools are operated formally by government, churches and private individuals while many are operated informally by private individuals, local communities and non-governmental organizations. Many parents, especially those in urban areas, take their children to preparatory schools as early as when they are three or four years old. Preparatory schools are usually more expensive than primary schools.

Primary education, this is the basic education in reading, writing and arithmetic, as well as other subjects such as history, geography, religious and social studies. Officially, primary education starts at Grade 1 , when a child is at least six years old and lasts for seven years. Prior to 2016 a pupil would sit for examinations on completion of the $7^{\text {th }}$ year. However starting from 2016 when basic education was introduced pupils can only write an examination and obtain a certificate, only after three years of lower secondary education completion.

Progression from secondary to high school is through the Junior Certificate (JC) examination, now basic education level, administered by the Examinations Council of Lesotho. High school candidates sit for the LGCSE Certificate, LGCSE is a locally prepared higher education school leaving certificate and it forms the entry requirement for higher and tertiary programs. Level 4 refers to post-secondary education which is not tertiary education. Institutions belonging to this category offer technical training, they are technical and vocational. All such institutions are owned by the government.

Levels 5, 6 and 7 are all grouped under tertiary education. Some of the institutions belonging to this level, to name a few are; Lesotho Collage of Education (LCE) the National University of Lesotho (NUL) and Limkokwing University of Creative Technology (LUCT). LCE trains teachers in both primary and junior secondary
schools. It trains part-time teachers that are already in-service as well as full time teachers who have not yet been absorbed into the labour market but were able to precede secondary education and met the entry requirement of LCE. The NUL offers degrees in education, humanities, natural sciences, agriculture, social sciences and law, as well as certificate and diploma. courses. It also offers a limited number of postgraduate programs. LUCT, founded in 2008, is determined to transform tertiary education and empower the young generation with creative learning through its new teaching methodologies such as thinking skills, innovative mind-sets and creativity.

### 1.1.2 Agency or School Ownership

The centres, schools or institutions are owned either solely by government, or private companies or jointly by government and private companies, churches or communities. These centres, schools or institutions are considered 'public' if they are solely owned by government, or not owned by the government, but government , government either pays their teachers' salaries or student school fees. Otherwise, schools are considered private.

### 1.2 Data Source and Quality

### 1.2.1 Source

The main source of information highlighted in this report is the annual school survey. The survey is conducted by sending ER42 (Annual Statistical Returns) forms to district education officers (DEO's) who in turn transmit the forms to the principals of schools. After completion, the principals submit the forms to the DEO's who in turn convey them to Education Planning Unit, Maseru.

The ER42 form is a detailed questionnaire that collects information from schools, centres and institutions. This collected information includes schools' physical location, type of ownership, general enrolment information, enrolment of repeaters, and orphans, teacher's profiles, school fees and general facilities such as buildings, classrooms and equipment. The questionnaire collects similar information for all levels of education with minor differences depending on the level's needs.

Apart from information collected from individual schools, centres or institutions, other information is acquired from secondary data within the Ministry of Education and Training; sources include Examinations Council, secondary school bursaries and annual budget plans. Further, information on tertiary bursaries and students studying abroad is gathered from other government departments such as National Manpower Development Secretariat (NMDS). Arrangements are in place to collect data from non- registered schools in the country to locate them to know their coverage so that these schools can be assisted to register with Ministry of Education. Their registration will ease the monitoring of quality of education offered at these schools. The foreign countries' embassies in Lesotho will also be visited to solicit information on Lesotho citizens who are studying in those respective countries.

### 1.2.2 Quality

Data quality is fairly good. In 2019, about 99.8 percent of Pre-primary, primary, secondary schools and non formal centers submitted their ER42 forms. At the data processing stage, missing information was substituted via proxies of 2018 information from the same schools.

The total number of registered primary schools that responded was 1486 in 2019. It should be noted that these are the schools that were operational and responded in the first two quarters of 2019 school calendar. The schools that were not operational during the data collection period were not covered even if they were already registered schools or opened after data collection period. Some of the schools were non-operational, not because they were officially closed, but because they had no students at the time. In 2019 the number of registered secondary schools was 348.

## Chapter 2: Early Childhood Care and Development (ECCD) Education

### 2.0 Introduction

Early childhood is viewed as a time of immense growth and development, when the brain develops most rapidly and a period when walking, talking, self-esteem, vision of the world and moral foundations are created within a child. The ECCD as an integral part of the pre-schooling process is influenced by three main dividends.

Firstly, children that are exposed to an effective ECCD are better equipped for the demands of the school system; this has been substantiated by records of improved academic achievement compared to children who did not attend the pre-schools. Therefore, ECCD programs enhance children's readiness for school. Secondly, ECCD activities reduce the number of repeat cases and failure rates, therefore allowing the system to optimally apply its limited resources to reach more school children. Lastly, ECCD has strong gender implications as it enables mothers to go to work and participate in development activities while children are being cared for, therefore ECCD programs also help improve gender equality.

ECCD education in Lesotho is divided into reception classes, home bases and centres; reception classes are centres attached to some of the existing primary schools. ECCD centres are privately owned by individuals while home bases are community-initiative pre- schools. All these schools offer the same curriculum; they only differ in ownership status. Data on ECCD education has been difficult to collect and to capture due to poor formal registration of centres and/or home bases which result in inadequate coverage of these centres.

### 2.1 Enrolment in Reception Classes

Table 2.1 shows enrolment in ECCD reception classes from 2010 to 2018. Enrolment in reception classes in 2014 was the highest with 6178, it can be observed from the table enrolment has been decreasing since 2015 to 2018. Observed in the table again was that the number of schools gradually increased from 2010, (219 schools) to 2018 ( 243 schools).

| Table 2.1 Number of Reception schools and Enrolment 2010-2019 |  |  |  |
| :--- | :---: | :---: | :---: |
| Year | Enrolment | No. of Schools | New Schools |
| 2010 | 5696 | 219 | 0 |
| 2011 | 5520 | 219 | 0 |
| 2012 | 5417 | 221 | 2 |
| 2013 | 5324 | 221 | 0 |
| 2014 | 6178 | 240 | 19 |
| 2015 | 5772 | 243 | 3 |
| 2016 | 5832 | 243 | 0 |
| 2017 | 5542 | 243 | 0 |
| 2018 | 5352 | 243 | 0 |
| 2019 | 5235 | 241 | -2 |

Table 2.2 shows enrolment and number of reception classes by district from 2017 to 2018. It can be observed from the table that overall enrolment have been decreasing in reception classes, from 5832 in 2016 to 5352 in 2018 . From 2017 to 2018, the following districts had the same or an increase in enrollment: Botha-Bothe, Leribe, Berea and Quthing while the remaining districts had a decrease in enrollment.

Table 2.2: Enrolment and Number of Reception Classes by District, 2017-2019

| District | Enrolment |  |  | No. of schools |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | ---: |
|  | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 9}$ | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 9}$ |
| Botha-Bothe | 483 | 486 | 501 | 19 | 19 | 18 |

| Total | $\mathbf{5 5 4 2}$ | $\mathbf{5 3 5 2}$ | $\mathbf{5 2 3 5}$ | $\mathbf{2 4 0}$ | $\mathbf{2 4 3}$ | $\mathbf{2 4 1}$ |

### 2.2 Enrolment in ECCD (reception classes included)

Table 2.3 shows ECCD enrolment by district, age and sex in 2019. Enrolment in ECCD centres (including reception classes) decreased from 50056 in 2018 to 47447 in 2019. The table reveals that total enrolment increased with age, for instance, from age less than 3 years (5310) up to age 4 years (12112) and age 5 years (13804) but declined to 7479 at age greater than 5 years. The distribution of ECCD enrolment by district indicates that Maseru was in the lead with 13694 (28.9 percent) learners, followed by Leribe with 8109 (17.1 percent) and the least number of learners were in Qacha's Nek with 1598 (3.4 percent). Comparison by sex and district shows that enrolment of girls exceeded that of boys in almost all the districts though the gap is gradually diminishing. Girls constituted 23909 ( 50.4 percent) and boys added up to 23538 ( 49.6 percent) - the percentages that are similar to the ones observed in 2018.

Table 2.3: ECCD Enrolment by District, Age and sex, 2019

| DISTRICT | AGE<3 |  | AGE 3 |  | AGE 4 |  | AGE 5 |  | AGE>5 |  | Total |  |

## ECCD Schools Gross and Net Enrolment Rates

Gross Enrolment Ratio (GER) for ECCD indicates enrolment of pupils regardless of age expressed as a percentage of the total population aged 3 to 5 . This indicator is used to demonstrate the general level of participation at ECCD level. It is also used to indicate the degree to which over-aged and under-aged children enrol in ECCD centres. A high GER shows that, there is a high degree of participation. The overall coverage of participation of the eligible population in the education system is usually indicated by Net Enrolment Rate (NER). A high value of NER indicates a high degree of participation of the official school-age population.

Table 2.4 (i) shows ECCD schools gross enrolment and net enrolment rate by sex for the period 2016 to 2019. From the table, it can be observed that both gross enrolment rate (GER) and net enrolment rate (NER) have been decreasing. GER decrease from 42.2 in 2016 to 36.6 in 2019 while NER decreased from 29.5 to 26.7 in the same period. Comparison by sex for both GER and NER showed that there were more females than males in ECCD schools from 2016 to 2019.

| Year | Gross Enrolment Rate (GER) |  |  | Net Enrolment Rate (NER) |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Males | Females | Total | Males | Females | Total |
| 2016 | 41.3 | 43.0 | 42.2 | 28.8 | 30.2 | 29.5 |
| 2017 | 40.8 | 42.4 | 41.6 | 29.2 | 30.2 | 29.7 |
| 2018 | 37.9 | 38.5 | 38.2 | 27.2 | 27.7 | 27.5 |
| 2019 | 36.3 | 36.8 | 36.6 | 26.5 | 26.9 | 26.7 |

### 2.2.1 Accessibility of Education in ECCD

Accessibility refers to a proportion of pupils that have equal and equitable opportunities to take full advantage of their education out of all children of admission age at the corresponding grade, which is age 3 for ECCD centres.

### 2.2.1.1 New Entrants in ECCD

Table 2.4(ii) illustrates ECCD new entrants by district and sex for the year 2019. There were 23347 new entrants in 2019, out of this number 11814 ( 50.6 percent) were boys and 11533 ( 49.4 percent) were girls. It was observed that the general pattern of new entrants by district is almost like the general pattern of the total enrolment. For instance, Maseru accounted for 6451 ( 27.6 percent), followed by Leribe with 3577 (15.3 percent) and the least was Qacha's Nek with 890 (3.8 percent).

Table 2.4(ii): ECCD New Entrants by District and Sex, 2019

| DISTRICT | $\mathbf{M}$ | $\mathbf{F}$ | Total | Percentage |
| :--- | :---: | :---: | :---: | :---: |
| BUTHA-BUTHE | 1083 | 1036 | 2119 | 9,1 |
| LERIBE | 1823 | 1754 | 3577 | 15,3 |
| BEREA | 1280 | 1251 | 2531 | 10,8 |
| MASERU | 3239 | 3212 | 6451 | 27,6 |
| MAFETENG | 875 | 820 | 1695 | 7,3 |

| QUTHING | 553 | 630 | 1183 | 5,1 |
| QACHAS NEK | 460 | 430 | 890 | 3,8 |
| MOKHOTLONG | 564 | 564 | 1128 | 4,8 |
| THABA-TSEKA | 940 | 874 | 1814 | 7,8 |
| Total | $\mathbf{1 1 8 1 4}$ | $\mathbf{1 1 5 3 3}$ | $\mathbf{2 3 3 4 7}$ | $\mathbf{1 0 0}$ |

### 2.3 Disability in ECCD Schools

Table 2.5 shows ECCD enrolment of children with special educational needs or disability by district, age and sex in 2019. Out of the total enrolment of 47447 learners in ECCD centres, 474 ( 0.9 percent) learners had some form disability. Furthermore, sex comparison shows that 266 ( 56.1 percent) were boys and 208 which is 43.9 percent were girls.

Among the districts, there were more males with special educational needs than their female counterparts in each district except for Mafeteng district where males and females figures were level. The Table further shows that Maseru had the highest number of learners with some form of disability of 104 ( 17.1 percent); it was followed by Berea with 86 (18.1 percent) and then Leribe with 72 (15.2 percent).

Table 2.5: ECCD Learners with special educational needs or disability by District, Age and Sex, 2019

| DISTRICT | AGE<3 |  | AGE 3 |  | AGE $\mathbf{4}$ |  | AGE 5 |  | AGE>5 |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ |
| BUTHA-BUTHE | 2 | 2 | 4 | 4 | 6 | 6 | 10 | 5 | 8 | 2 |
| LERIBE | 5 | 1 | 6 | 3 | 8 | 12 | 11 | 10 | 10 | 6 |
| BEREA | 0 | 1 | 7 | 5 | 11 | 10 | 6 | 5 | 21 | 20 |
| MASERU | 7 | 2 | 9 | 11 | 12 | 15 | 20 | 10 | 10 | 8 |
| MAFETENG | 1 | 1 | 3 | 3 | 4 | 5 | 2 | 4 | 4 | 1 |
| MOHALES HOEK | 0 | 0 | 0 | 0 | 3 | 1 | 7 | 1 | 3 | 1 |
| QUTHING | 1 | 2 | 5 | 1 | 3 | 7 | 3 | 7 | 0 | 4 |
| QACHAS NEK | 3 | 0 | 1 | 0 | 1 | 1 | 6 | 8 | 6 | 1 |
| MOKHOTLONG | 0 | 2 | 2 | 1 | 3 | 1 | 9 | 2 | 1 | 0 |
| THABA-TSEKA | 0 | 0 | 1 | 4 | 5 | 4 | 12 | 4 | 4 | 4 |
| Total | $\mathbf{1 9}$ | $\mathbf{1 1}$ | $\mathbf{3 8}$ | $\mathbf{3 2}$ | $\mathbf{5 6}$ | $\mathbf{6 2}$ | $\mathbf{8 6}$ | $\mathbf{5 6}$ | $\mathbf{6 7}$ | $\mathbf{4 7}$ |

Table 2.6 displays enrolment of children with special education by type of disability, age and sex for the year 2019. When disaggregating enrolment of pupils with special education by type of disability, majority of children with special education had physical disability and intellectual disability with 160 (33.8 percent) and 104 (21.9 percent) respectively. Intellectual disability includes forms of learning difficulty, epilepsy and mental retardation. Hearing impairment had the least number of children with 44 ( 9.3 percent).

Table 2.6: ECCD Learners with Special Educational Needs by Disabilty Type and Age, 2019

| DISABILITY TYPE | AGE<3 | AGE 3 | AGE 4 | AGE 5 | AGE>5 | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

| OTHER | 4 | 14 | 37 | 27 | 20 | 102 |
| Total | $\mathbf{3 0}$ | $\mathbf{7 0}$ | $\mathbf{1 1 8}$ | $\mathbf{1 4 2}$ | $\mathbf{1 1 4}$ | $\mathbf{4 7 4}$ |

### 2.4 Orphan-hood in ECCD Schools

Table 2.7 displays ECCD orphans by type, age and sex in 2019. Out of the total enrolment in ECCD centres, 1944 were learners that had either lost one or both of their parents in 2019. It can be observed from the table that paternal orphans constituted about 1245 ( 64 percent) of these orphans, whereas maternal and double orphans accounted for 423 ( $21.8 \%$ ) and 276 (14.2\%) respectively.

Table 2.7: ECCD Orphans by Type, Age and Sex, 2019

| AGE<3 | AGE 3 | AGE 4 | AGE 5 | AGE>5 |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ |  |
|  | 40 | 46 | 82 | 92 | 130 | 169 | 202 | 212 | 122 | 150 | 1245 |
| Maternal | 14 | 20 | 30 | 46 | 47 | 34 | 63 | 65 | 42 | 62 | 423 |
| Double | 10 | 12 | 18 | 21 | 20 | 43 | 51 | 35 | 29 | 37 | 276 |
| Total | $\mathbf{6 4}$ | $\mathbf{7 8}$ | $\mathbf{1 3 0}$ | $\mathbf{1 5 9}$ | $\mathbf{1 9 7}$ | $\mathbf{2 4 6}$ | $\mathbf{3 1 6}$ | $\mathbf{3 1 2}$ | $\mathbf{1 9 3}$ | $\mathbf{2 4 9}$ | $\mathbf{1 9 4 4}$ |

Table 2.8 displays ECCD orphans by district, age and sex in 2019. Maseru had the higher percentage of orphans in ECCD centres as it was represented by 429 (22.1 percent). It was followed by Leribe and Berea with 13.7 and 12.2 percent respectively. Quthing was the least with 4.7 percent orphans' country wide.

Table 2.8: ECCD Orphans by District, Age and Sex, 2019

| DISTRICT | AGE<3 |  | AGE 3 |  |  |  | AGE 4 |  | AGE 5 |  | AGE>5 |  | Total |

Table 2.9 illustrates ECCD teachers by district and sex in 2019. The number of teachers in ECCD centres during the year 201 was 2711. The table shows that there were more female teachers with 2648 ( 97.7 percent) than their male counterparts with 63 ( 2.3 percent). A similar trend is observed for districts whereby Maseru was leading with 24.9 percent of teachers in this level of education. It was seconded by Leribe with 17.1 percent and then Berea with 11.7 percent.

Table 2.9: ECCD Teachers by District and Sex, 2019

| DISTRICT | $\mathbf{M}$ | $\mathbf{F}$ | Total | \% |
| :--- | :---: | :---: | :---: | :---: |

Table 2.10 shows the number of ECCD schools by district and agency in 2019. Maseru had the highest number of schools with 449 ( 21.4 percent), Leribe followed with 314 (14.9 percent) ECCD and Qacha's Nek was the least with $96(4.5$ percent).
Among these schools, 1393 ( 66.5 percent) were owned by community, followed private with 373(17.8 percent) schools and then government with 91 (4.3 percent) ECCD schools.

## Chapter 3: Primary School Education

### 3.0 Introduction

Free Primary Education (FPE) Policy commenced in 2000 in Lesotho. The first cohort of free primary education entered into secondary schools in 2007 and completed junior secondary in 2009 and senior secondary or high school in 2011. In 2016 when basic education level was introduced, the first formal certificate is obtained at the end of Junior Secondary education.

### 3.1 Enrolment in Registered Primary Schools

Table 3.1 below shows enrolment in registered primary schools by age, grade and sex in 2019. It is observed from the table that the total enrolment at this level was 329770 in 2019 . Out of this enrolment number, 51.1 percent of them were males enrolled at this level whereas females constituted 48.9 percent.

It is also observed that there were also more males than females enrolled in all grades at this level except for grade 6 and 7 where the number of females enrolled exceeds the number of males. The majority of learners registered in primary schools ranged from the age of 6 to 14 years.

Table 3.1: Enrolment in Registered Primary Schools by Age, Grade and Sex, 2019

Table 3.2 displays the distribution of enrolment in registered primary schools by grade, sex and year starting from 2015 up to 2019. As indicated earlier, enrolment in primary schools has been showing a declining trend since 2015 to 2019.
The table further illustrates that 16.8 percent was enrolment for grade 1 which was followed by grade 4 and grade 5 with 14.5 and 14.4 percent enrolment respectively. The lowest enrolment was in grade 7 , valued at 12.4 percent.

Table 3.2: Enrolment in Registered Primary Schools by Grade, Sex and Year, 2015-2019

| Grade | 2015 |  | 2016 |  | 2017 |  | 2018 |  | 2019 |  |

Table 3.3 illustrates enrolment in registered primary schools by district, sex and years from 2017 to 2019. The highest number of learners were enrolled in Maseru with 76,928 ( 23.3 percent), followed by Leribe with 52,238 learners ( 15.8 percent) and the least were in Qacha's Nek with 13,615 ( 4.1 percent). The table further reveals that during these three years period, the total enrolment has been declining from 354,847 in 2017 to 329,770 in 2019. Enrolment in primary schools declined between 2017 and 2019 in all the districts.

Table 3.3: Enrolment in Registered Primary Schools by District, Year and Sex, 2017-2019

Table 3.4 shows enrolment in registered primary schools by district, geographical location and sex of learners. In general, it is shown that majority of primary school learners ( 71.6 percent) were in the rural areas whereas, less than half of this percentage was in the urban areas.The table further demonstrates that in most of the districts the number of boys enrolled in registered primary schools was higher than that of their female counterparts with an exception of Mokhotlong and ThabaTseka in both urban and rural areas.

Table 3.4: Enrolment in Registered Primary Schools by District, Geographical Location and Sex, 2019

Table 3.5 displays enrolment in registered primary schools by district, ecological zone and sex in 2019. It is observed from the table that enrolment was high in the Lowlands with 55.1 percent; followed by the Mountains enrolment with 23.6 percent and the least enrolment was in Senqu river valley with 10.1 percent.

Furthermore, the table shows that more males than females were enrolled in the Lowlands, Foothills and Senqu River. In the mountain areas, majority of districts had higher enrolment among females in 2019 as illustrated in table below.

Table 3.5: Enrolment in Registered Primary Schools by District, Zone and Sex, 2019

Table 3.6 illustrates enrolment of primary school learners in public and private schools by district and sex. For the purpose of analysis in this report, public schools represent those owned by government, churches and communities. These are the schools that get aids or funding from the Government such as payment of salaries of teachers, renovation and construction of classrooms and provision of other facilities. Private schools on the other hand function independent of the Government aid but observe the government stipulated curriculum or follow its guidelines closely if an alternative curriculum is used.

It is shown from the table that 320,190 (97.1 percent) of learners were enrolled in public schools while only 9,580 ( 2.9 percent) was enrolled in private schools. Amongst all districts, the number of males enrolled in public primary schools was higher than the enrolment for females, except for Mokhotlong and Thaba-Tseka where the number of females enrolled in public primary schools outstripped that of males.

The table further displays that within the private schools, some districts such as Mohale's Hoek, Quthing, Qacha's Nek, Mokhotlong and Thaba-Tseka had no enrolment or private primary schools in 2019. Enrolment of females in private primary schools was slightly higher than that of males in Botha-Bothe, Berea, Maseru and Mafeteng while enrolment of males was slightly higher than that of females in Leribe.

Table 3.6: Enrolment in Registered Public and Private Schools by District and Sex, 2019

| DISTRICT | PUBLIC |  |  |  | PRIVATE |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Table 3.7 illustrates enrolment in registered primary schools by district, agency and sex in 2019. It is observed from the table that enrolment was highest in LEC primary schools with 106,890(32.4 percent) learners; followed by RCM with 104,438(31.7 percent) learners and least number of learners was in AME with 3,386(1.0 percent) learners. In disaggregating enrolment by agency and sex, males dominated the enrolment for females in all the districts except community, other churches and private schools where females were more than their male counterparts.

### 3.1.1 Accessibility of Education

Accessibility is defined as the proportion of children who have access to schooling out of all children of admission age at the corresponding grade, which is age 6 for grade 1 (primary school) admission in Lesotho. In this section, the extent of access to the first grade of primary education is discussed in detail.

### 3.1.1.1 New Entrants in Registered Primary Schools

Figure 3.1 shows the enrolment of new entrants in registered primary schools by age and sex in 2019. History has shown that since the year 2009, the number of new entrants for boys has been higher than that of their female counterparts. This is also observed in the year 2019 where the percentage of new male enrollees stood at 52.8 percent and females constituted 47.2 percent. The figure portrays that enrolment of new entrants was at the peak precisely at the age of six (the official admission age) for both boys and girls. Afterwards enrolment for both sexes drastically dropped until it was almost zero at ages 10 and upwards with male's enrolment being slightly higher.

Table 3.8 demonstrates the enrolment of new learners in registered primary schools by district and sex in 2019. It is shown in the table that enrolment of new entrants has a similar pattern to that of the total enrolment in registered primary schools as it is observed that even for the new entrants, Maseru was leading with 11091(23.2 percent) of new entrants. It was followed by Leribe with 7585 ( 15.9 percent); then Berea and Mafeteng with 5964(12.5) and 4369(9.1 percent) respectively.

Table 3.8: New Entrants in Primary Schools by District and Sex, 2019

| District | Male | Male (\%) | Female | Female (\%) | Total |
| :--- | :---: | :---: | :---: | :---: | :---: |
| BOTHA-BOTHE | 1349 | 5,3 | 1318 | 5,8 | 2667 |

| Total | $\mathbf{2 5 2 7 2}$ | $\mathbf{1 0 0}$ | $\mathbf{2 2 5 5 6}$ | $\mathbf{1 0 0}$ | $\mathbf{4 7 8 2 8}$ |

### 3.1.1.2 Registered Primary Schools Apparent Intake Rates (AIR) and Net Intake Rates (NIR)

The Apparent Intake Rates (AIR) and Net Intake Rates (NIR) for Lesotho from 2000 to 2019 are shown in Table 3.9. The Apparent and Net intake rates indicate accessibility of new entrants of a particular entering age for a particular grade, out of all children of admission age at the corresponding grade, which is age 6 in Lesotho for primary schools. The two ratios are essential to policy makers and planners because they specify the degree of accessibility of primary school education. AIR is a crude measure because it considers all new entrants irrespective of age while NIR accounts for official entrance age for new entrants.

The Apparent Intake Rate (AIR) was highest in the year 2000 (200.9 percent) as seen in Table 3.9, thereafter it decreased continuously until 2013 then started to increase with fluctuations from 104.4 in 2015 to 127.9 in 2019. The year 2000 recorded a massive AIR due to the commencement of free primary education which resulted in high enrolment. Gender comparison in AIR indicates that more males had access to primary education than females.

Net Intake Rate (NIR) on the other hand, has been fluctuating since 2000 to 2019 ranging between 53.3 and 72.3 percent. Both AIR and NIR have been in favour of boys from 2013 to 2019.

Table 3.9: Registered Primary Schools Apparent and Net Intake Rates and Gender Parity Indices by Sex, 2000-2019

| Year | Apparent Intake Rates |  |  | GPI <br> (AIR) | Net Intake Rates (NIR) |  |  | GPI <br> (NIR) |

| 2009 | 105.5 | 98.8 | 102.2 | 0.94 | 55.4 | 54.7 | 55.0 | 0.99 |
| 2010 | 106.1 | 98.2 | 102.2 | 0.93 | 60.8 | 59.1 | 60.0 | 0.97 |
| 2011 | 105.1 | 99.4 | 102.2 | 0.95 | 58.0 | 59.1 | 58.5 | 0.99 |
| 2012 | 103.3 | 97.3 | 100.4 | 0.94 | 56.9 | 57.7 | 57.3 | 1.01 |
| 2013 | 97.1 | 90.8 | 94.0 | 0.94 | 53.9 | 52.8 | 53.3 | 0.98 |
| 2014 | 99.4 | 92.6 | 96.1 | 0.93 | 55.3 | 54.7 | 55.0 | 0.99 |
| 2015 | 111.1 | 99.7 | 104.4 | 0.90 | 59.5 | 58.2 | 58.8 | 0.98 |
| 2016 | 139.0 | 123.0 | 131.0 | 0.88 | 73.4 | 71.3 | 72.3 | 0.97 |
| 2017 | 135.2 | 120.0 | 127.6 | 0.89 | 71.7 | 69.5 | 70.6 | 0.97 |
| 2018 | 132.5 | 117.7 | 125.1 | 0.89 | 71.4 | 67.9 | 69.7 | 0.95 |
| 2019 | 137.0 | 118.7 | 127.9 | 0.87 | 72.4 | 69.4 | 70.9 | 0.96 |

### 3.1.2 Gender Parity Index in Registered Primary Schools

Gender Parity Index (GPI) measures equality between boys and girls at any school level, we therefore consider GPI at primary school level in this chapter. A value of one (1) indicates enrolment equality between males and females, while a value of more than more than one (1) signifies more females than males in the selected age group and a value less than one (1) indicates more males than females. The GPI associated with AIR in Table 3.9 above reveals that overall, more males than females have access to primary education.

However, when the appropriate school going age is considered, NIR indicates that for most of the years under review, generally more females than males have had access to primary schooling from 2000 to 2012 ; which is consistent with the fact that some males attend school at older ages as they become herd boys before they start going to school especially in the mountainous districts.

### 3.1.3 Coverage of Participation in Primary Education

Gross Enrolment Ratio (GER) is defined as enrolment in a specified level of education (regardless of age) expressed as a percentage of the total official age population for that level. This indicator is used to demonstrate the general level of participation in a particular level of education. It is also used to signify the degree to which over-aged and under-aged children enroll in primary school in this case. A high GER shows that, there is a high degree of participation.

The overall coverage of participation of eligible population in the education system is indicated by Net Enrolment Rate (NER) therefore a high value of NER indicates a high degree of participation of the official school-age population.

Table 3.10 shows a slow fall in GER from 2016 to 2019, which reflects gradual decrease in the degree of participation, with NER also reducing from 89.4 to 85.8 percent during the same period.

Comparison by sex reveals that from 2007 to 2019 GER for males was higher than that of females while the opposite was largely observed in the preceding period. On the other hand, NER for females reflected a complete dominance over that of males, reaching its peak in 2016 at 89.4.

Provision of quality basic education is one of the strategic goals of the Ministry of Education and Training and in order to achieve this, the Ministry set itself targets; one such was the reduction of the pupil-teacher ratio from $41: 1$ in 2007 to $40: 1$ by the year 2015. It is evident that these target has log been attained. Since 2007, the ratio was was far above the Ministry's target $40: 1$ pupils to one teacher. . The ratio further dropped to 37 pupils to one teacher from 2007 to 32.4 in 2019.

Table 3.10: Registered Primary Schools Gross and Net Enrolment Rates and Pupils Teacher Ratios, 2001-2019
Gross Enrolment Net Enrolment

| Year | Males | Females | GPI | Total | Males | Females | GPI | Total | PTR |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2001 | 120.6 | 123.2 | 1.02 | 121.9 | 79.5 | 85.4 | 1.07 | 82.7 | 47 |

| 2010 | 116.2 | 113.9 | 0.98 | 115.1 | 80.1 | 83.5 | 1.04 | 81.8 | 34 |
| 2011 | 114.6 | 111.3 | 0.97 | 113.0 | 80.2 | 83.1 | 1.04 | 81.6 | 34 |
| 2012 | 111.6 | 108.8 | 0.97 | 110.2 | 79.6 | 82.6 | 1.04 | 81.1 | 34 |
| 2013 | 105.8 | 103.9 | 0.98 | 104.9 | 75.6 | 79.0 | 1.04 | 77.3 | 33 |
| 2014 | 103.4 | 101.1 | 0.98 | 102.3 | 75.1 | 78.2 | 1.04 | 76.6 | 33 |
| 2015 | 101.0 | 98.5 | 0.98 | 99.8 | 74.4 | 77.2 | 1.04 | 75.8 | 33.1 |
| 2016 | 119.0 | 113.0 | 0.98 | 116.0 | 89.0 | 89.8 | 1.01 | 89.4 | 33.8 |
| 2017 | 115.7 | 109.8 | 0.95 | 112.7 | 87.1. | 87.8 | 1.00 | 87.0 | 33.0 |
| 2018 | 109.6 | 103.9 | 0.95 | 106.7 | 84.8 | 85.6 | 1.00 | 85.2 | 33.4 |
| 2019 | 108.4 | 102.2 | 0.94 | 105.3 | 85.9 | 85.7 | 1.00 | 85.8 | 32.4 |

Table 3.11 summarizes pupil teacher ratios (PTR) for 2019 by districts. It is observed from the table that the pupil teacher ratio for registered primary schools in general was estimated at 32.4 pupils per teacher. It ranged from 28.4 in Mohale's Hoek to 38.6 pupils per teacher in Mokhotlong.

Table 3.11: Learners Enrolled in Registered Primary Schools by District, 2019

| District | Enrolment |  |  | Teachers |  |  | PTR |

### 3.2 Disability in Registered Primary Schools

Out of the total enrolment of 329,770 in registered primary schools in 2019, about 14,537 were learners with the special educational needs. This implies that 4.4 percent of learners had some form of disability in 2019.

Table 3.12 below demonstrates enrolment of learners with special educational needs in registered primary schools by type of disability, grade and sex in 2019. It can be seen from the table that intellectual disability accounted for 8249 ( 56.7 percent) of the pupils with disability, followed by visual impairment with 2927 (20.1 percent) and the form of disability with less pupils is physical disability with 993 (6.8 percent). It should be noted that intellectual disability includes forms of learning difficulty, epilepsy and mental retardation.

Table 3.12: Learners with Special Educational Needs in registered Primary Schools by disability, Grade and sex, 2019

| Disability Type | Grade 1 |  | Grade 2 |  | Grade 3 |  | Grade 4 |  | Grade 5 |  | Grade 6 |  | Grade 7 |  | Total |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | M | F | M | F | M | F | M | F | M | F | M | F | M | F |  |
| Physical Disability | 136 | 100 | 88 | 53 | 84 | 52 | 65 | 48 | 87 | 65 | 58 | 54 | 51 | 52 | 993 |

| Hearing Impairment | 62 | 66 | 61 | 56 | 103 | 71 | 139 | 99 | 131 | 137 | 121 | 133 | 101 | 119 | 1399 |
| Intellectual Disability | 542 | 366 | 624 | 335 | 652 | 362 | 855 | 444 | 919 | 520 | 865 | 494 | 777 | 494 | 8249 |
| Other | 100 | 55 | 91 | 51 | 74 | 49 | 85 | 62 | 92 | 52 | 77 | 44 | 83 | 54 | 969 |
| Total | 998 | 709 | 1062 | 621 | 1118 | 671 | 1387 | 850 | 1509 | 978 | 1401 | 968 | 1285 | 980 | 14537 |

Table 3.13 shows enrolment of learners with special educational needs by district, zone and sex in 2019. The table indicates that there were more male learners with disabilities that was calculated as 76162 ( $59.1 \%$ ) and female learners as the least with 52706 ( $40.9 \%$ ). The situation was observed in all the zones. The highest number of learners with special educational needs of 79078 which is about 61 percent was in the lowlands. This is due to the fact that formal special education schools are in the lowlands of some districts in the country.

### 3.3 Orphan-hood in Registered Primary Schools

Out of the total enrolment of 329,770 in 2019 , there were 61,966 learners enrolled in registered primary schools who had either lost one or both parents through death.

Table 3.14 displays enrolment of orphans in registered primary schools by type of orphan-hood, grade and sex in 2019. It is observed from the table that the percentage of paternal orphans was leading with $37638(60.7$ percent) of all the orphans in registered primary schools; then followed maternal orphans with 13997 (22.6 percent) and double orphans with $10331(16.7$ percent). The table further shows that majority of orphans were males in all the grades except in both Grade 6 and grade 7 .

Table 3.14: Enrolment of Orphans in Registered Primary Schools by Type, grade and Sex, 2019

| Type | GRADE 1 |  | GRADE 2 |  | GRADE 3 |  | GRADE 4 |  | GRADE 5 |  | GRADE 6 | GRADE 7 | Total |  |  |

Note: Paternal = Father deceased; Maternal = Mother deceased; Double = Both Parents deceased.
Table 3.15 presents enrolment of orphans in registered primary schools by district, zone and sex 2019. It is observed from the table that there were more male orphans in all the zones except in the mountain. Comparison by zones depicts that there were more orphans in the lowlands (52.4\%) followed by mountain (24.6\%), foothills (12.2\%) and senqu river valley (10.8\%) respectively.

### 3.4 Inputs for Primary Education

The Ministry of Education and Training values inputs to primary education as key to shifting this level to the higher step; to ensure the support to primary education, The Ministry's huge responsibility comprises of provision of appropriate buildings, qualified teachers, sufficient facilities and education materials to increase the accessibility of schools and achieve sustainable enrolment gains at this level of education.

### 3.4.1 Primary Schools

Since the past century, the majority of the schools in the country belong to the churches and community. However, schools owned by Government are currently increasing and those that are privately owned even though they are still fewer than those owned by churches. Despite the fact that provision of quality education is a joint responsibility between agencies and the government, the government is largely responsible for the payment of teachers and provision of financial support for most of these registered schools belonging to these agencies.

Figure 3.3 presents the percentage share of registered primary schools by agencies in 2019. It is observed from the figure that RCM had the majority of the registered primary schools with 34 percent, followed by LEC with 32 percent and schools registered by AME were the least with 1 percent. In general, most primary schools were owned by the individual churches while government and community maintained 11 percent and 4 percent of schools respectively.

Table 3.16 illustrates the enrolment in registered primary schools, number of schools, number of teachers and percentage change in enrolment from 2010 to 2019. The table demonstrates that primary school enrolment decreased from 388,681 in 2010 to 329,770 in 2019. The table further indicates that the total number of primary schools increased continuously from 1,473 in 2010 to 1,486 in 2019. It should be noted that these are the schools that have responded to the annual survey and were operational during data collection period for these ten years. Some of the schools that were not operational were schools that were not officially shut down or closed but rather none-operational because they had no students enrolled in the first and the second quarters of school calendar during data collection.

It should be noted that reduced number of schools may not necessarily mean reduction of registered schools, but since Government has been building schools in the remote and hard to walk by children to reduce long walking- distances by children to schools; and so children leave their old schools which are further off to attend new government schools, which are also better equipped with facilities and teaching staff, which leaves old schools with little or no children.

Table 3.16 furthermore shows that number of orphans enrolled in primary school level have been relatively high as it constituted 18.8 percent of the total enrolment in 2019. Evidently, free primary education has facilitated access to education for many orphans at this level of education.

Table 3.16: Registered Primary School Enrolment, Number of Schools, Number of Teachers and Percentage Change in Enrolment, 2010-2019

| Indicators | $\mathbf{2 0 1 0}$ | $\mathbf{2 0 1 1}$ | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 6}$ | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 8}$ | $\mathbf{2 0 1 9}$ |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Enrolment <br> \% Change <br> in | 388681 | 385437 | 381690 | 369469 | 366048 | 361637 | 360756 | 354847 | 340421 | 329770 |
| Enrolment <br> Number of <br> schools | -0.2 | -0.8 |  | -1 | -3.2 | -0.9 | -0.01 | -0.2 | -1.7 | -4.2 |
| Number of <br> teachers | 11573 | 1468 | 1469 | 1472 | 1477 | 1478 | 1478 | 1483 | 1486 | 1486 |
| Number of <br> Orphans | 120463 | 116558 | 122178 | 115379 | 110825 | 94333 | 89466 | 82412 | 73046 | 61966 |
| Number of <br> Learners <br> with <br> Special <br> needs | 20490 | 20635 | 19682 | 20100 | 20357 | 18951 | 18232 | 18875 | 17981 | 14537 |

It is further shown that the number of learners with special educational needs in registered primary schools has been higher over the years under observation, however lower than that of orphans.

Table 3.17 presents the distribution of schools by district and ecological zone. As a result, it is observed that in general, out of 1,486 registered primary schools in 2019, majority of them which is represented by 632 ( 42.5 percent) were in the lowlands; this percentage was followed by the one for mountains with 439 (29.5 percent). The Senqu river valley and foothills accounted for 15.4 and 12.5 percent of schools respectively.

It is further observed from the table that within the Lowlands, Maseru had the highest number of schools (158); it was followed by Leribe with 139 and then Mafeteng with 123 while Mohale's Hoek had 54 registered primary schools in this ecological zone. It is further observed that from Quthing to Thaba-Tseka there were no Lowlands or no schools in the Lowlands.

In the Foothills, majority of schools were also in Maseru (64); it was followed by Mafeteng with 35 schools; Leribe with 33; Botha-Bothe with 29 and lastly Berea with 24 schools; whereas; the rest of the other districts had very few or no Foothills or no schools in that Ecological zone.

Berea had only one (1) school in the Mountains while Mafeteng had no school in the Mountains or there are no Mountainous areas in that district. Botha-Bothe had 12 schools in the same Ecological zone. On the other hand, Thaba-Tseka and Mokhotlong accounted respectively for 134 (30.4 percent) and 106 ( 24.0 percent) of schools in the Mountains of Lesotho. There are only four districts with the Senqu River Valley; namely; Mohale's Hoek; Quthing and Qacha's Nek and their respective percentages ranged from 3.5 to 38.5 .

Table 3.17: Registered Primary Schools by District and Ecological Zones, 2019

Table 3.18 presents the number and percentage distribution of registered schools by district and type of institution. It is shown from the table that majority of registered primary schools were public, while private schools were fewer in number. In general out of 1,486 registered primary schools in Lesotho, 98.0 percent were public schools in 2019 .

Maseru accounted for more registered public and private primary schools estimated at 17 and 37.9 percent respectively. It was followed by Leribe that had public and private schools that are shown as 13.5 and 27.6 percent. Botha Bothe had the least percentages of public and private schools.

Table 3.18: Number and Percentage Distribution of Registered Schools by District and type of institution, 2019

| District | PUBLIC |  | PRIVATE |  | TOTAL |
| :---: | :---: | :---: | :---: | :---: | :---: |

Table 3.19 displays the number and percentage distribution of registered primary schools by residence and district in 2019. It is shown in the table that 84.7 percent of the registered primary schools were in the rural areas.

In the urban areas, Maseru constituted the highest percentage estimated at 29.1 while in the rural areas Maseru and Leribe accounted for about 15.3 percent and 14.2 orderly.

Table 3.19: Number and Percentage Distribution of Registered Primary Schools by Residence, and District, 2019

### 3.4.2 Teachers in Registered Primary Schools

This sub-section focuses mainly on teachers and whether they were qualified or not. It further compares them by district and pupil to teacher ratio by district and sex. Out of the total number of 10,193 primary school teachers in 2019, 9457 (92.8\%) were qualified. However, it is observed that these qualified teachers were not willing to teach in the mountainous districts such as Qacha's Nek and Mokhotlong as low number was detected. It is further observed that generally there were more pupils per qualified primary school teacher than primary school pupils per teacher irrespective of the qualifications. Thus one qualified teacher was to teach 34 primary school learners, whereas, there were 32 primary school learners who were supposed to be taught by one teacher irrespective of the teacher's qualification.

Table 3.20: Enrolment, Number of Teachers and Pupil to Teacher Ratios in Registered Primary Schools by District and Sex, 2019

| District | Enrolment |  |  | Total Teachers |  |  | Qualified Teachers |  |  | Unqualified Teachers |  |  | Pupil qualified) TeacherRatios |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | M | F | Total | M | F | Total | M | F | Total | M | F | Total | PTR | PQTR |
| Botha-Bothe | 10634 | 10213 | 20847 | 164 | 522 | 686 | 158 | 420 | 578 | 6 | 102 | 108 | 30,4 | 36.1 |
| Leribe | 27042 | 25196 | 52238 | 355 | 1284 | 1639 | 332 | 1183 | 1515 | 23 | 101 | 124 | 31,9 | 34.5 |
| Berea | 20381 | 18784 | 39165 | 270 | 980 | 1250 | 258 | 895 | 1153 | 12 | 85 | 97 | 31,3 | 34.0 |
| Maseru | 39447 | 37481 | 76928 | 513 | 1716 | 2229 | 494 | 1608 | 2102 | 19 | 108 | 127 | 34,5 | 36.6 |
| Mafeteng | 16312 | 14921 | 31233 | 293 | 762 | 1055 | 280 | 709 | 989 | 13 | 53 | 66 | 29,6 | 31.6 |
| Mohale's Hoek | 14428 | 13817 | 28245 | 257 | 736 | 993 | 244 | 688 | 932 | 13 | 48 | 61 | 28,4 | 30.3 |
| Quthing | 9869 | 9524 | 19393 | 162 | 448 | 610 | 150 | 426 | 576 | 12 | 22 | 34 | 31,8 | 33.7 |
| Qacha's Nek | 7004 | 6611 | 13615 | 111 | 332 | 443 | 105 | 314 | 419 | 6 | 18 | 24 | 30,7 | 32.5 |
| Mokhotlong | 10218 | 10562 | 20780 | 157 | 381 | 538 | 139 | 359 | 498 | 18 | 22 | 40 | 38,6 | 41.7 |
| Thaba-Tseka | 13151 | 14175 | 27326 | 244 | 506 | 750 | 222 | 473 | 695 | 22 | 33 | 55 | 36,4 | 39.3 |

The ratios for the qualified teachers were highest in Mokhotlong and Thaba-Tseka as they were 41.7 and 39.3 pupils per qualified teacher respectively; then followed Maseru with 36.6 pupils per qualified teacher. Even though the ratios for all teachers were high also in Mokhotlong and Thaba-Tseka they were lower than the ones for the qualified teachers as they were estimated at 38.6 and 36.4 respectively. The table further shows more qualified female teachers than their male counterparts.

The distribution of teachers in registered primary schools by district, agency and sex is illustrated in Table 3.21. From the table, it is observed that out of 10,193 teachers in registered primary schools, 9,906 which are 97.2 percent of them were in public schools. There were also more female teachers than male teachers in registered primary schools as female teachers in registered public primary schools were represented by 75.2 percent and those in private primary schools also accounted for 74.2 percent.

The table further shows that Maseru district accounted for 2229 (21.9 percent) of all primary teachers; it was followed by Leribe with 1639 (16.1 percent) and then Berea and Mafeteng with 1250 (12.3 percent) and 1055 ( 10.4 percent) respectively.

Table 3.21: Teachers in Registered Primary Schools by District, Public, Private and Sex, 2019

| THABA-TSEKA | 244 | 506 | 750 | 0 | 0 | 0 | 750 |

### 3.5 Efficiency and Quality of Education

The term 'efficiency' is derived from economic theory; it is defined as the optimal relationship between inputs and outputs. An activity is said to be carried out efficiently when a given quantity of output is obtained with a minimum amount of inputs or when a given quantity of inputs produces maximal output. The term applies to all types of planned behavior geared towards defined objectives hence its adoption by planners in the field of education.

The pupil-year concept is a convenient, non-monetary way of measuring inputs. One pupil-year stands for all the resources used to keep one pupil in school for one academic year. Therefore, it represents one year's worth of education and accompanying expenditure. Two pupil years, for instance, represent the resources needed to keep one pupil in school for two years. If a pupil repeats a grade, he is getting only one year's worth education, but consuming two years' worth of expenditure. If it takes 6 years to qualify for a certain diploma, a pupil who has dropped out of school after only three years has used three years' worth of expenditure but failed to obtain the qualifying diploma. In the analysis of efficiency, repeaters and dropouts represent waste in the educational system.

In order to track the flow of pupils through an education system, at the beginning of the year it is necessary to ask a question such as: "What has become of the pupils enrolled in a particular grade the previous year?" There are three possible and mutually exclusive events: (a) Pupils may have been promoted to the next higher grade, (b) Pupils may have repeated the same grade, (c) Pupils may have dropped out (that is, left school entirely, emigrated to another school system or died).

Successful pupils might have gone through the cycle and graduated from the final year of the cycle. Promotion, repetition and dropout rates are the three likely paths of pupils' flow from grade to grade and they characterize the efficiency of the education system in producing graduates. These rates are, therefore, used for monitoring, evaluation and projection of the efficiency of pupil flow in an education system.

### 3.5.1 Repeaters in Registered Primary Schools

Table 3.22 illustrates enrolment of repeaters in registered primary schools by age, grade and sex in 2019. It is revealed that out of the total 329,770 of learners enrolled in registered primary schools in 2019, about 29,389 (8.9 percent) were repeaters. The table also discloses that generally high percentage of repeaters was in grade 1 with 19.3 and reduced to 13.2 in grade 2 . The percentage of repeaters increased afterwards from 14.5 in grade 3 to 16.8 percent in grade 4 and then continuously declined from 16.2 percent in grade 5 to 8.0 percent in grade 7 .

The percentage of repeaters was highest at 12.6 percent in age 11 years, and then followed by age 12 years with 12.2 percent. About 12.1 percent of repeaters were in age 7 years. For age 10 and 7 years, the percentages were 11.9 and 11.5 percent respectively. The table further shows that the male repeaters were entirely dominant across all the grades and all the ages.

Table 3.22: Enrolment of Repeaters in Registered Primary Schools by Age, Grade and Sex, 2019

| >20 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 3 | 3 | 3 | 3 | 6 |
| Total | 3582 | 2087 | 2455 | 1434 | 2844 | 1406 | 3229 | 1719 | 3043 | 1724 | 2116 | 1395 | 1187 | 1168 | 18456 | 10933 | 29389 |

The analysis of repeaters by District, Ecological Zone, and Sex is shown in Table 3.23. It is revealed in the table below that the Lowlands and Mountains had the higher number of primary school repeaters represented by 44.3 and 31.2 percent respectively, while the Foothills and Senqu River Valley had the least number of repeaters estimated at 11.0 and 13.4 percent separately.

Maseru also had the highest number of repeaters represented by 19.1 percent, whereas Qacha's Nek constituted only 2.9 percent as the least.

Table 3.23: Registered Primary School Repeaters by District, Ecological Zone and Sex, 2019

### 3.5.3 Transition Rates from Standard 7 to Form A

Transition rates represent the number of pupils admitted into the first grade/form of a higher level of education in a given year, expressed as a percentage of the total number of pupils enrolled in the final grade of the lower level of education in the previous year. This indicator communicates information about the degree of transition from one level of education to the next. High transition rates indicate a high level of success from one level of education to another.

Table 3.24 illustrates that transition rates have been fluctuating since the year 2001 to 2019; the lowest transition rate was recorded in 2003 as 61.6 while the highest transition rate has been recorded as 80.5 in 2018. The table also indicates that more males than females proceeded from standard 7 to Form A from 2001 to 2007. The trend reversed direction from 2008 to 2019 whereby more females than males progressed from standard 7 to Form A.

Table 3.24: Transition Rates from Standard 7 to Form A, 2001-2019
Transits from Standard 7 to Form A Transition Rates

| Year | Males | Females | Total | Males | Females | Total |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| 2001 | 9799 | 13035 | 22834 | 67.0 | 66.7 | 66.8 |

## Chapter 4: Secondary School Education

### 4.0 Introduction

Secondary education is an intermediate level between Primary Level and Technical School College or University. This level of education generally comprises of junior or lower and senior or upper secondary education. Junior secondary level covers Form A to Form C, and the Junior Certificate (JC) is awarded on successful completion of Form C.

However Since 2016 Junior certificate also forms part of basic education level which comprise of pre primary, primary and lower secondary levels. Senior secondary level begins from Form D to Form E. Cambridge Overseas School Certificate (COSC) which is currently known as the Lesotho General Certificate in Secondary Education (LGCSE) is awarded on successful completion of Form E. Usually provided at this level is general, technical or vocational and college preparatory curricula. In Lesotho, junior and senior secondary schools are inseparable in terms of facilities and teaching staff.

### 4.1 Enrolment in Registered Secondary Schools

Table 4.1 below shows enrolment in Lower and Upper Registered Secondary schools by age, level of education and sex in 2019. The total enrolment in the lower secondary education (Form A - C) for the year 2019 was 101315 which consist of 44479 boys and 56836 girls. While in the upper secondary education (Form D - E) total enrolment in the same year was 33769 which consist of 13944 boys and 19825 girls. The overall enrolment in 2019 in registered secondary schools was 135084 students. This number consists of 58,423 ( 43.3 percent) boys and 76,661 (56.7 percent) girls enrolled in all registered secondary schools.

The overall enrolment in 2019 in registered secondary schools was 135084, while in 2018 the total enrolment was 138894 students. This shows a decrease in enrolment of 2.7 percent between 2018 and 2019. While between 2017 and 2018 the total enrolment in registered secondary schools increased by 7.2 percent.

Table 4.1: Distribution of Enrolment in Lower and Upper Registered Secondary Schools by Age, Level of education and Sex, 2018

| 23 | 1 | 2 | 5 | 3 | 15 | 4 | 21 | 9 | 30 | 64 | 52 | 142 | 112 | 206 | 164 | 370 | 400 |
| 24 | 0 | 1 | 5 | 7 | 14 | 7 | 19 | 15 | 34 | 16 | 25 | 59 | 53 | 75 | 78 | 153 | 187 |
| >24 | 0 | 2 | 2 | 2 | 3 | 9 | 5 | 13 | 18 | 20 | 35 | 26 | 55 | 46 | 90 | 136 | 154 |
| Total | 19955 | 22984 | 14939 | 20382 | 9585 | 13470 | 44479 | 56836 | 101315 | 7890 | 11480 | 6054 | 8345 | 13944 | 19825 | 33769 | 135084 |

Table 4.2 displays the distribution of secondary enrolment in the districts by agency and sex in 2019. This shows that 131756 ( 97.5 percent) of students enrolled in registered public secondary schools as compared to 3328 ( 2.5 percent) enrolled in registered private secondary schools. In both public and private registered secondary schools, the number of girls enrolled is higher than that of boys. There were 74848 ( 56.8 percent) girls enrolled in registered public secondary schools compared to 56908 ( 43.2 percent) boys. While in private registered secondary schools there were 1813 ( 54.5 percent) girls and 1515 ( 45.5 percent) boys.

This also depicts that among students who enrolled in registered private secondary schools a larger proportion of students are enrolled in Maseru district with 56.5 percent, while Leribe followed with 25.8 percent. Berea and Mafeteng followed with 10.4 percent and 5.3 percent respectively, and Butha-Buthe had the lowest enrolment with 2.0 percent.

Furthermore, it portrays that these registered private secondary schools were mostly found in the northern districts of Lesotho which are Butha-Buthe, Leribe, and Berea. While other private schools were found in Maseru and very few in Mafeteng. Other districts, such as Mohale's Hoek, Quthing, Qacha's Nek, Thaba-Tseka and Mokhotlong did not have registered private secondary schools.

Table 4.2: Distribution of Enrolment in Registered Public and Private
Secondary Schools by District, Public, Private and Sex - 2019

| MOKHOTLONG | 1962 | 3875 | 5837 | 0 | 0 | 0 | 5837 |
| THABA-TSEKA | 1671 | 3238 | 4909 | 0 | 0 | 0 | 4909 |
| Total | $\mathbf{5 6 9 0 8}$ | $\mathbf{7 4 8 4 8}$ | $\mathbf{1 3 1 7 5 6}$ | $\mathbf{1 5 1 5}$ | $\mathbf{1 8 1 3}$ | $\mathbf{3 3 2 8}$ | $\mathbf{1 3 5 0 8 4}$ |

Table 4.3 portrays distribution of enrolment in registered secondary schools in the districts, ecological zones and sex in 2019. It shows that registered secondary schools in Maseru have the highest proportion of enrolment as compared to other districts. The proportion of students who enrolled in registered secondary schools in Maseru is 27.1 percent, while Leribe and Berea followed with 18.6 percent and 13.2 percent respectively. The districts with the lowest student enrolment in registered secondary schools were Mokhotlong, Thaba-Tseka and Qacha's Nek with 4.3 percent, and 3.6 percent respectively.

This table further shows that student enrolments in the lowlands is higher than those in other ecological zones. For instance, the proportion of students enrolled in the lowlands is 71.9 percent of the total enrolment. This is followed by enrolment in the mountainous with 13.3 percent, while the lowest students' enrolment is in the Foothills and Senqu River Valley with 8.1 and 6.7 percent respectively.

Table 4.3: Distribution of Enrolment in Registered Secondary Schools by District, Ecological Zone and Sex, 2019

| Maseru | 15559 | 19162 | 34721 | 26.9 | 16980 | 20277 | 37257 | 26.8 | 16504 | 20127 | 36631 | 27.1 |
| Mafeteng | 6447 | 7924 | 14371 | 11.1 | 6900 | 8311 | 15211 | 11 | 6634 | 8159 | 14793 | 11.0 |
| Mohale's Hoek | 3361 | 4604 | 7965 | 6.2 | 3496 | 4803 | 8299 | 6 | 3550 | 4723 | 8273 | 6.1 |
| Quthing | 2540 | 3657 | 6197 | 4.8 | 2876 | 3749 | 6625 | 4.8 | 2651 | 3562 | 6213 | 4.6 |
| Qacha's Nek | 1843 | 2850 | 4693 | 3.6 | 2087 | 3246 | 5333 | 3.8 | 1931 | 2884 | 4815 | 3.6 |
| Mokhotlong | 1818 | 3703 | 5521 | 4.3 | 2065 | 4042 | 6107 | 4.4 | 1962 | 3875 | 5837 | 4.3 |
| Thaba-Tseka | 1663 | 3110 | 4773 | 3.7 | 1831 | 3440 | 5271 | 3.8 | 1671 | 3238 | 4909 | 3.6 |
| Total | 55429 | 73763 | 129192 | 100 | 60382 | 78512 | 138894 | 100 | 58423 | 76661 | 135084 | 100.0 |

Table 4.4 reveals trend enrolment from 2017 to 2019 by district and sex. It can be observed from the table that enrolment has been increasing but dropped from 2018 to 2019. As shown in the table, from 2017 to 2019 the three districts were leading in enrolments, Maseru with 27.1 percent, Leribe with 18.6 percent and Berea with 13.2 percent, whereas Qacha's Nek and Thaba-Tseka had the least enrolments resulting to low percentage representations. This pattern has been the same in the past three years displayed in the table.

The table further illustrates that enrolment of males had been fluctuating for the period under review whereas females' enrolment had been steadily increasing. The table also shows that female enrolment had been higher than male enrolment in all the districts from 2017 to 2019.

Figure 4.1: Percentage distribution in Registered Secondary Schools from 2017 to 2019 by Sex

### 4.3 New Entrants in Registered Secondary Schools

Figure 4.2 depicts new entrants in lower secondary (Form A) and upper secondary (Form D) by age and sex in 2019. In Form A, the new entrants were at peak at age 13 for both sexes, while ages 13 to age 15 were the next highest. From age 16 the decrement to age to age 19, the opposite is observed. In Form D, the number of new entrants was dominated at age 17 for both males and females. For ages 16 to 18 years' new entrants were high; For both form A and Form D Females New entrants surpassed their New entrant's males' counterparts.

### 4.4 Coverage of Participation in Secondary Education

The Gross Enrolment Rate (GER) and Net Enrolment Rate (NER) indicate the overall coverage of an educational system in relation to the population eligible for participation in the system. A high NER denotes a high degree of participation of the official school-age population. The theoretical maximum value is 100 percent. Therefore, increasing trends reflect improvement in the participation at the specified level of education. The incidence of under-aged and over-aged enrolment can be observed by the GER.

### 4.4.1 Gross and Net Enrolment Rates, Pupils to Teacher Ratios and the Gender Parity Indices for Registered Secondary Schools

Table 4.5 demonstrates gross and net enrolment rates, pupils' teacher ratios and gender parity index for registered secondary schools for the period 2004 to 2018. Compared to the primary level, secondary school ratios remained quite low for the period under review. However, unlike primary schools where rates have been decreasing, rates in secondary schools have been generally increasing over the years, as they increased from 2004 to 2018 . For instance, the total net enrolment rate has been increasing from 23.8 percent in 2004 to 46.8 percent in 2018.

The gender parity indices from gross enrolment rates and net enrolment rates have almost remained constant in more than 10 years' time. This signifies the gender disparity that is slightly in favour of females at this level of education.

The pupil' teacher ratios represent the average number of students per teacher; the figures from 2004 to 2019 are displayed in Table 4.5. During the period under review, the pupil teacher ratios have been fluctuating between 23.5 and 26.6. Although the pupil teacher ratios seemed to be low, some teachers may still be loaded and teach many children while others may be underutilized. The situation originates from the uneven distribution of enrolments and teachers in registered secondary schools. Many teachers would not like to teach in the remote areas hence, are overcrowded in the schools located in the lowlands or urban areas.

Table 4.5: Secondary School Enrolment Rates, Gender Parity Indices and Pupil Teacher Ratios, 2004-2018

| Year | Gross Enrolment Rates |  |  | Net Enrolment Rates |  |  |  | PTR |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{T}$ | GPI | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{T}$ |  |  |
| 2004 | 32.2 | 41.5 | 36.8 | 1.3 | 18.6 | 29 | 23.8 | 1.5 | 25.0 |
| 2005 | 34.2 | 44 | 39.1 | 1.3 | 19.8 | 31.2 | 25.4 | 1.6 | 26.6 |
| 2006 | 34.8 | 44.9 | 39.8 | 1.3 | 20 | 31.4 | 25.7 | 1.6 | 25.7 |
| 2007 | 35.5 | 47.3 | 41.4 | 1.3 | 20.8 | 33.4 | 27 | 1.6 | 24.4 |
| 2008 | 37.1 | 50.6 | 43.8 | 1.4 | 22.3 | 35.9 | 29 | 1.6 | 24.0 |
| 2009 | 39.7 | 55.8 | 47.7 | 1.4 | 23.8 | 39.4 | 31.5 | 1.7 | 23.5 |
| 2010 | 44.4 | 61.9 | 53.1 | 1.4 | 26 | 42.5 | 34.2 | 1.6 | 25.8 |
| 2011 | 46.5 | 64.4 | 55.4 | 1.4 | 27.6 | 44.2 | 35.8 | 1.6 | 24.9 |
| 2012 | 46.9 | 64.0 | 55.4 | 1.4 | 28.5 | 44.6 | 36.5 | 1.6 | 25.1 |
| 2013 | 46.9 | 63.6 | 55.2 | 1.4 | 29.2 | 45.6 | 37.3 | 1.6 | 24.1 |
| 2014 | 47.1 | 64.5 | 55.7 | 1.4 | 29.4 | 46.2 | 37.7 | 1.6 | 23.9 |
| 2015 | 47.3 | 64.5 | 55.8 | 1.4 | 30.4 | 47.3 | 38.7 | 1.6 | 24.0 |
| 2016 | 51.9 | 70.4 | 61.1 | 1.4 | 34.0 | 52.3 | 43.1 | 1.6 | 24.0 |
| 2017 | 51.5 | 69.4 | 60.4 | 1.3 | 34.6 | 52.1 | 43.3 | 1.5 | 25.0 |
| 2018 | 55.4 | 72.9 | 64.1 | 1.3 | 38.5 | 55.1 | 46.8 | 1.4 | 26.0 |
| 2019 | 56.7 | 75.7 | 66.1 | 1.3 | 41.4 | 59.0 | 50.1 | 1.4 | 25.0 |

Table 4.6 displays the net enrolment rates for lower and upper secondary schools aggregated by sex. Generally, the GER and NER for the lower secondary education are much higher than those in the upper secondary education. For the NER, this implies that there was high degree of participation of the official school age population in lower secondary than upper secondary. The table also denotes the improvement of both GER and NER rates between 2016 and 2019. The variation in participation by sex revealed that female's participation of the official school age population was higher than that of males. For instance, in 2019 the lower secondary schools NER for males was observed as 37.1 percent and the one for females was 56.7 percent. In the upper secondary education, it was estimated at 11.1 and 21.0 for males and females respectively.

Table 4.6 NER and GER for Lower and Upper Secondary Education, 2016 to 2019

### 4.5 Enrolment of Students with Special Educational Needs in Registered Secondary Schools

Table 4.7 portrays the distribution of students enrolled in registered secondary schools with special education by district, urban-rural residence and sex in 2019. This shows that 3493 ( $52.9 \%$ ) of students with special education were enrolled in registered secondary schools in rural areas while 3110 ( $47.1 \%$ ) were enrolled in the urban areas. It further illustrates that registered secondary schools with special education in Leribe had the highest number of students who enrolled in 2019 with 1827 (27.7\%), while Maseru district followed with 1066 (16.1\%) and Thaba-Tseka was the lowest with 135 ( $2.0 \%$ ).

Table 4.7: Number of Students with Special Education in Registered Secondary Schools by District, Urban-Rural and Sex, 2019

| DISTRICT | URBAN |  |  | RURAL |  |  | TOTAL | \% |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| THABA-TSEKA | 7 | 13 | 20 | 25 | 90 | 115 | 135 | 2.0 |
| TOTAL | 1207 | 1903 | 3110 | 1489 | 2004 | 3493 | 6603 | 100 |

Table 4.8 depicts the number of students in registered secondary schools with special education by disability type, level of education and sex in 2019. This shows that among the disability type that students have in registered secondary schools in 2019, 44.7 percent of them had visual impairment. It was followed by those with Intellectual Disability which constituted 22.5 percent. Students who had Physical Disability constituted the lowest 7.2 percent of all who registered in secondary schools in 2018.

Furthermore, students with some form of disabilities in those registered secondary schools were highest in the lower levels for both males and females and lowest in the higher levels. In Form A, students with disabilities amounted to 813 (12.3 percent) for males and 1013 ( 15.3 percent) for females while in Form E, males and females added to 331 ( 5.0 percent) and 557 ( 8.4 percent) respectively. Generally, in every level of secondary education there were more girls with some form of disability than boys.

### 4.6 Orphans in Registered Secondary Schools

Table 4.10 portrays the number of orphans in registered secondary schools by Orphan type, level of education and sex in 2019. It can be seen from the table that the proportion of paternal orphans is high with 25622 ( $56.0 \%$ ), followed by students who are double orphans with 10734 (23.5\%) and the least was maternal orphans with 9355 (20.5\%).

Table 4.10: Orphans in Registered Secondary Schools by Type, Level of Education and Sex, 2019

| Orphan <br> Type | FORM A |  | FORM B |  | FORM C |  | FORM D |  | FORM E |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | F | $\mathbf{M}$ | F | $\mathbf{M}$ | F | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | F |  |  |
| Paternal | 3564 | 4310 | 2654 | 3737 | 1869 | 2728 | 1591 | 2148 | 1250 | 1771 | 25622 |
| Maternal | 1337 | 1528 | 970 | 1331 | 695 | 869 | 598 | 902 | 462 | 663 | 9355 |

Table 4.11 presents the number of orphans in registered secondary schools by district, urban-rural and sex in 2019. It is observed from the table that Maseru had the highest proportion of orphans with 11344 (24.8\%), followed by Leribe with 8511 (18.6\%) and the least number of orphans was in Thaba-Tseka with 1620 (3.5\%).

The table further shows that in all the districts, the rural areas had the higher number of orphans than the urban areas. Orphans in the rural areas constituted 29527 (64.6\%) while those in the urban areas contributed only 16184 (35.4\%).

### 4.7 Inputs for Secondary Education

### 4.7.1 Secondary Schools

Table 4.13 represents the distribution of registered secondary schools by districts and school agency in 2019. School agency in this case means that the school is either owned by public or private agency. The public schools include those owned by government, churches and the community, while private schools include those owned by individual people.

The table shows that most of registered secondary schools in Lesotho are owned by the public, almost 335 ( $96.3 \%$ ), while 13 ( $3.7 \%$ ) of them are owned by the private agency. Most of these public schools are found in Maseru and Leribe with 73 ( $21.0 \%$ ) and $70(20.1 \%)$ respectively, while Berea district came third with 43 (12.3\%). The districts with the lowest public secondary schools were Quthing and Mokhotlong with 16 (406\%) and 17 (4.9\%) respectively.

Table 4.13: Number of Registered Secondary Schools by District, Public and Private, 2019

| DISTRICT | PUBLIC | PRIVATE | Total | Percentage |
| :--- | :---: | :---: | :---: | :---: |
| BUTHA-BUTHE | 23 | 1 | 24 | 6.9 |
| LERIBE | 66 | 4 | 70 | 20.1 |
| BEREA | 41 | 2 | 43 | 12.4 |

Table 4.14 depicts the distribution of registered secondary schools by district and urban-rural setting in 2019. It shows that most of registered secondary schools are in the rural areas as compared to those in the urban areas. It further illustrates that
of all registered secondary schools in Lesotho, 264 (75.9 percent) of them are in the rural areas, while 84 ( 24.1 percent) are in the urban areas.

It also portrays that out of the total (84) secondary schools found in the urban areas Maseru district have 31 registered schools which constitute 36.9 percent. This is followed by schools in Leribe district with 15 ( 17.9 percent) while Mokhotlong has only one registered secondary school in the urban area.

Table 4.14: Number of Registered Secondary Schools by District and urban-rural, 2019

| DISTRICT | URBAN | RURAL | Total |
| :--- | :---: | :---: | :---: |
| BUTHA-BUTHE | 8 | 16 | 24 |
| LERIBE | 15 | 55 | 70 |

| QACHAS NEK | 5 | 15 | 20 |
| MOKHOTLONG | 1 | 15 | 16 |
| THABA-TSEKA | 4 | 15 | 19 |
| TOTAL | $\mathbf{8 4}$ | $\mathbf{2 6 4}$ | $\mathbf{3 4 8}$ |

Figure 4.3 reveals the percentage distribution of registered secondary schools by ecological zones in 2019. Most of the schools were in the Lowlands ( 63 percent) and that the second highest percentage was for the Mountains with 18.0 percent while Foothills and Senqu River Valley had only 10.0 percent and 9 percent respectively.

Figure 4.3: Percentage share of registered secondary schools by Ecological Zone, 2019

Figure 4.4 presents the distribution of registered secondary schools by agency in 2019. It is shown from the figure that majority of schools were owned by Government and RCC and both recorded 26 percent each. Community, Other churches and Private schools also shared 4.0 percent each while AME schools were the least with only 1.0 percent.

Figure 4.4: Percentage share of Registered secondary schools by Agency, 2019

### 4.7.2 Secondary Schools Teachers

This sub-section focuses on teachers at secondary level; these qualified and unqualified teachers in registered schools are compared by district, pupil to teacher ratio, district and sex. There were 5322 teachers in registered secondary schools in 2019. Unqualified teachers refer to teachers without teaching qualifications; these include graduates in other fields of study as well as teachers who have only obtained secondary qualifications like LGCSE and JC.

Table 4.15 indicates that female teachers constituted 55 percent while males represented 45 percent of the total teachers and 56 percent were females and 44 percent were males. Out of the total teachers, 5300 (99.6) were qualified,. this means that almost all teachers were qualified. Overall district comparison reflects that Mokhotlong had the highest percentage of teachers 29 percent, seconded Maseru and Thaba-Tseka with 27 percent of teachers each, then Botha-bothe and Berea followed with 26 percent each.

The pupil teacher ratio (PTR) was 25 pupils per teacher for the entire country and it ranged from 24 to 30 pupil's per teacher across the districts. The table further reveals that pupil-qualified teacher ratio (PQTR) was also 25, which equaled the overall pupil teacher ratio (PTR) in 2019. Leribe, had the slight difference between PTR and PQTRs meaning that there were some few unqualified teachers in this district. Mokhotlong and Thaba Tseka, ranged the highest in percentages of PTR
and PQTR with 29 and 27 percent respectively, indicating that in these districts there were more children per one teacher on average.

Table 4.15: Number of Teachers in Registered Secondary Schools by District and Sex, 2019

| District | Enrolment |  |  | Teachers |  |  | Qualified |  |  | Unqualified |  |  | PTR | PQTR |

| Total | 58423 | 76661 | 135084 | 2393 | 2929 | 5322 | 2382 | 2918 | 5300 | 11 | 11 | 22 | 25 | 25 |

Table 4.16 shows the distribution of teachers in registered secondary schools by district school agency and sex in 2019. It discloses that most of teachers are teaching in the registered public secondary schools ( 97.1 percent), while those who work in private registered secondary schools constitutes 2.9 percent. It also shows that a larger proportion of these teachers were in the district of Maseru with 25.3 percent, followed by Leribe district with 20.1 percent and the lowest was ThabaTseka with 3.4 percent.

### 4.8 Efficiency and Quality of Education in Registered Secondary Schools

### 4.8.1 Repeaters in Registered Secondary Schools

Table 4.17 presents the distribution of repeaters in registered secondary schools by districts, ecological zone and sex in 2019. There are four ecological zones in Lesotho, and each district has different ecological zone based on its location, but no district has all these four ecological zones.

It shows that most of students who were repeaters were attending schools located in the Lowlands with 13755 ( $72.8 \%$ ), followed by those who were in the Mountains with 2476 ( $13.1 \%$ ) and the lowest were in the Senqu River Valley with 1218 ( $6.4 \%$ ).

Table 4.18 displays the distribution of repeaters in registered secondary schools by districts, urban-rural location and sex in 2019. It depicts that a higher proportion of the repeaters were in Maseru, Leribe and Berea with 4298(22.7\%), 3835(20.3\%) and $2836(15.0 \%)$ respectively. The lowest proportions of repeaters were in Quthing, Qacha's Nek and Thaba-Tseka districts with 863 (4.6\%), 747(4.0\%) and 584(3.1\%) respectively. It further shows that 12000 ( 63.5 percent) repeaters were in the rural area while 6894(36.5 percent) were in the urban area.

Table 4.18: Repeaters in Registered Secondary Schools by District, Urban-Rural and Sex, 2019

Table 4.19 depicts the distribution of repeaters in registered secondary schools by age, level of education and sex in 2019. It denotes that a higher proportion of repeaters were in form A with 6808(36.0 percent) while those in Form B and Form D followed with 6740 ( 35.7 percent) and 2990(15.8 percent) orderly. It further shows that most of these repeaters were in ages 17,16 and 15 years with $4046(21.4 \%)$, $3668(19.4 \%)$ and 3262(17.3\%) respectively.

### 4.8.2 Transition Rates from Form C to Form D

Table 4.20 illustrates the transition rates from form C to form D . Transition rates reveal that there were more females than males who progressed from Form C to Form D from 2010 to 2013 while more males than females progressed from 2014 to 2016. It also reflects that on overall the gap between male and female transition rates was diminishing in the period under review. The table also reveals that the transition rate had improved from 2016 (71.7) to 2017 where 71.8 percent was noted.

Table 4.20: Transition Rates from Form C to Form D,
2002-2018

| 2002 - 2018 |  |  |  |

### 4.8.3 Examination Results

Examinations Council of Lesotho (ECOL) conducts examinations and assessment tests, for primary and secondary education, in a manner that will improve the culture of learning and maintain the quality and standards of education in Lesotho in order to open opportunities for further education and the world of work within the country and beyond. One of its objectives is to provide certificates to all candidates who have achieved the desired levels of performance in primary and secondary schools. Below is an analysis of Junior Certificate and Cambridge Overseas School Certificate (COSC) examinations results.

### 4.8.3.1 Junior Certificate Examinations

Table 4.21 displays the Junior Certificate examination results from 2008 to 2018. It is shown from the table that the percentages for Merit and first classes had been fluctuating with minimal differences during the period under review. Recently, merit pass declined from 1.9 in 2015 to 1.8 percent in 2018. First class percentages also dropped from 6.4 to 5.9 during the same period. Second Class Passes decreased from 48.1 to 45.8 whereas third class passes were approximately stable at 12 percent from 2015 to 2018. The number of those who failed declined from 31.5 in 2015 to 34.5 percent in 2018.

### 4.8.3.2 Lesotho General Certificate in Secondary Education (LGCSE)

The Government has localized the final examination the senior secondary level, hence an introduction of the Lesotho General Certificate in Secondary Education (LGCSE) which started in the year 2014. In the past, more than 20 years ago, y Cambridge Overseas School Certificate (COSC) was obtained at the end of senior secondary education.

Table 4.22 displays LGCSE/IGSE examinations results per district in 2018. The table illustrates that Maseru was top with $3966(27.6 \%)$ students that sat for the examinations and was followed by Leribe and Berea with 2896(20.2\%) and 2047 (14.3\%) respectively. The table further illustrates that most students passed their subjects with symbol E followed by symbol D and C.

## Chapter 5: Technical and Vocational Education Training

### 5.0 Introduction

Technical and Vocational Education Training (TVET) can be defined as an occupation and employment-based education. Learning may be facilitated either through formal schools, centres or institutions that are publicly or privately owned, or through informal, traditional-apprenticeship and or non-formal semi-structured training. The nature of the content is purposefully designed to prepare learners for specific trades, crafts and careers, largely through practical-based learning and complementary theory to equip learners with the acquisition of practical competencies, the know-how and attitudes necessary to perform in their respective occupations within the labour market. Institutions belonging to this category in Lesotho award appreciation, national and international certificates and diploma's in a range of study fields from agriculture, basic handicrafts, home economics, hospitality, construction, engineering, business, management and IT. Courses offered range from a period of one year to 36 months.

### 5.1 Enrolment

Table 5.1 reveals enrolment in registered technical and vocational schools by age and sex in 2018. It can be seen from the table that enrolment in 2018 was 4584, where female learners constituted 2646 ( 57.7 percent) and their male counterparts accounted for 1938 ( 42.3 percent). Age comparison depicts that although there were more learners aged 23 with 723(15.8 percent), on average most learners at this level were aged between 18 and 25 years.

Table 5.1: Enrolment in Registered Technical and Vocational Schools by Age and Sex, 2018

| Age | $\mathbf{M}$ | $\mathbf{F}$ | Total |
| :--- | :---: | :---: | :---: |
| $<14$ | 3 | 3 | 6 |
| 14 | 3 | 0 | 3 |
| 15 | 3 | 3 | 6 |
| 16 | 14 | 16 | 30 |
| 17 | 26 | 53 | 79 |
| 18 | 94 | 323 | 417 |
| 19 | 209 | 200 | 409 |
| 20 | 205 | 325 | 330 |
| 21 | 154 | 188 | 342 |
| 22 | 137 | 218 | 723 |
| 23 | 222 | 283 | 424 |
| 24 | 141 | 257 | 462 |
| 25 | 116 | 104 | 220 |
| 26 | 406 | 1938 | 2646 |

Table 5.2 displays enrolment in registered technical and vocational schools by district, agency and sex for the year 2018. Unlike in ECCD, primary and secondary school levels, Technical and Vocational schools are not scattered all over the districts within the country as they are found only in seven districts, these are Maseru amounting to 2628 ( 57.3 percent) followed by Leribe and Mohale's Hoek with 959 ( 20.9 percent) and 484 ( 10.6 percent) respectively. It was also observed that the larger portion of students 1780 ( 38.8 percent) were enrolled in private institutions while 1142 ( 24.9 percent) and 1121 ( 24.5 percent) were enrolled in RCM and government institutions respectively.

Table 5.2: Enrolment in Registered Technical and Vocational Schools by District, Agency and Sex, 2018

| THABA-TSEKA | 134 | 53 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 187 |  |  |  |  |
| Total | 429 | 692 | 46 | 72 | 222 | 83 | 513 | 629 | 11 | 107 | 717 | 1063 | 4584 |  |  |  |  |

Table 5.3 shows repeaters in registered technical and vocational schools by district and sex for the year 2018. Out of the total enrolment of 4584 in this level of education, repeaters constituted 508 (11.1 percent) out of whom 275 (54.1 percent) were males and 233 ( 45.9 percent) were females. Comparison by agency demonstrates that majority of repeaters were in RCM institutions with 356 (70.1 percent) trail by private with 137 ( 27.0 percent) and lastly LEC institutions with 15 (3.0 percent). Maseru had the highest percentage of repeaters which was 84.6 percent and was followed by Mohale's Hoek with 10.4 percent.

Table 5.3: Repeaters in Registered Technical and Vocational Schools by District and sex, 2018

| District | LEC |  | RCM |  | PRIVATE |  | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| LERIBE | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ |  |
| MASERU | 0 | 0 | 0 | 0 | 4 | 6 | 10 |
| MOHALES HOEK | 0 | 0 | 206 | 97 | 48 | 79 | 430 |
| QUTHING | 0 | 0 | 4 | 49 | 0 | 0 | 53 |
| MOKHOTLONG | 12 | 0 | 0 | 0 | 0 | 0 | 12 |
| Total | 1 | 2 | 0 | 0 | 0 | 0 | 3 |

Table 5.4 demonstrates the number of students who left school in technical and vocational institutions by district, agency and sex for the year 2018. The table reflects that out of the total enrolment of 4584 students, 778 (16.9 percent) of students dropped out in this level of education. Distribution by district shows that

Maseru was leading with 707 ( 90.9 percent) number of drop outs; this number was followed by that of Leribe which was 41 ( 5.3 percent) while Mohale's Hoek had 18(2.3 percent) as number of students who left school.

The table further illustrates that 604 ( 77.6 percent) students who left school were from Government institutions. That was followed by 93 ( 12.0 percent) that were from private institutions then 61 ( 7.8 percent) students that were from RCM institutions. Comparison by sex showed an uneven distribution in favour of females constituting a higher percentage of 72.9.

Table 5.4: Students Who Left School in Technical and Vocational Institutions by District, Agency and Sex, 2018

| DISTRICT | GOVMENT |  |  | COMM |  | LEC |  | RCM |  |  | PRIVATE |  | Total |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ | $\mathbf{M}$ | $\mathbf{F}$ |  |  |  |
| LERIBE | 10 | 9 | 0 | 0 | 0 | 0 | 0 | 12 | 4 | 6 | 41 |  |  |
| BEREA | 0 | 0 | 3 | 2 | 0 | 0 | 0 | 0 | 0 | 0 | 5 |  |  |

| Total |  |  |  |  |  |  |  |  |  |  |  |  |  |

Table 5.5 presents the number and percentage of students that dropped out of Technical and Vocational institutions by major reason for dropping out and sex. It is observed from the table that a total of 778 students were reported to have left school in 2018. Out of the total number that left school, the highest proportion 647 (83.2 percent) dropped out because they were seeking employment while 33 (4.2 percent) had no funds and the other 25 ( 3.2 percent) left because of pregnancy.

Table 5.5: Students Who Left School in Registered Technical and Vocational Schools by Reason and Sex, 2018

| Major Reasons for Leaving | M | F | Total | \% |
| :--- | :---: | :---: | :---: | :---: |

### 5.2 Teaching Staff

Table 5.6 displays teachers in technical and vocational institutions by district, agency and sex for the year 2018. As prior mentioned that the majority of the students and institutions were in Maseru, the number of teachers at this level also followed the same trend as 70 ( 35.4 percent) was highest number of teachers in Maseru. Mohale's Hoek and Leribe had 43 (21.7 percent) and 42 (21.2 percent)
respectively; as depicted in the table. Disaggregation of teachers by agency indicated that majority of teachers were in RCM with 77 ( 38.9 percent) seconded by Private institutions with 50 ( 25.3 percent) while the least was ACL with 10 ( 5.1 percent).

Table 5.6: Teachers in Registered Technical and Vocational Schools by District, Agency and Sex, 2018

| DISTRICT | GOVEMENT |  | COMM |  | LEC |  | RCM |  | ACL |  | PRIVATE |  | Total | \% |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | M | F | M | F | M | F | M | F | M | F | M | F |  |  |
| LERIBE | 1 | 1 | 0 | 0 | 0 | 0 | 15 | 10 | 2 | 8 | 2 | 3 | 42 | 21.2 |
| BEREA | 0 | 0 | 4 | 1 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 5 | 2.5 |
| MASERU | 2 | 3 | 4 | 3 | 0 | 0 | 7 | 6 | 0 | 0 | 26 | 19 | 70 | 35.4 |
| MOHALES HOEK | 0 | 0 | 3 | 1 | 0 | 0 | 8 | 31 | 0 | 0 | 0 | 0 | 43 | 21.7 |
| QUTHING | 0 | 0 | 0 | 0 | 17 | 2 | 0 | 0 | 0 | 0 | 0 | 0 | 19 | 9.6 |
| MOKHOTLONG | 0 | 0 | 0 | 0 | 2 | 2 | 0 | 0 | 0 | 0 | 0 | 0 | 4 | 2.0 |
| THABA-TSEKA | 12 | 3 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 15 | 7.6 |
| Total | 15 | 7 | 11 | 5 | 19 | 4 | 30 | 47 | 2 | 8 | 28 | 22 | 198 | 100.0 |

Table 5.7 reflects teachers in registered technical and vocational schools by teacher's rank in 2018. It is shown that out of 198 teachers in 2018, 105 (53 percent) were males while 93 ( 47 percent) were females. The table further shows that teachers were largely populated in the lower ranks such as Teacher Assistant 71 ( 35.9 percent) and assistant specialist Teacher 38 (19.2 percent) and that the percentages were low in the higher ranks.

Table 5.7: Teachers in Registered Technical and Vocational Schools by Teacher's Rank and Sex, 2018

| TEACHER'S RANK | $\mathbf{M}$ | F | Total |
| :--- | :---: | :---: | :---: |
| Assistant Specialist Teacher | 30 | 8 | 38 |
| Associate Teacher | 4 | 7 | 11 |

| Teacher | 10 | 14 | 24 |
| Teacher Assistant | 38 | 33 | 71 |
| Total | 105 | 93 | 198 |

## Chapter 7: Non Formal Education

### 7.0 Introduction

Non-Formal Education (NFE) may be defined as a type of education in which content is adapted to suit the unique needs of students to maximize their learning capacity. It is more learner-centred, as optional curriculum is emphasized unlike formal education where the prescribed sequential curriculum is used. NFE learning is facilitated typically through interest-based courses, workshops, community courses, projects and or seminars. Much like formal education, learning takes place in formal learning environments (learning centres) which do not however observe the usual formal school education conventions such as keeping roll, enforcing discipline and writing reports.

There are several bodies that govern institutions belonging to this category in Lesotho. Principally, as part of the government's vision for the role of education in the development process, the Lesotho Distance Teaching Centre (LDTC) was set up to complement formal school education; to provide a broader and more practical form of education; and to reach larger and more diverse learners. It covers both formal and non-formal divisions of education. The former is facilitated through correspondence courses at Junior Certificate (JC) and Cambridge Overseas School Certificate (COSC) levels, whereas the latter is facilitated by providing basic practical skills to a large proportion of the population living in the country's rural areas and offers opportunities for out-of-school youth and adults to develop their literacy and numeracy skills. Apart from LDTC there are other institutions and associations which recognize NFE initiatives in Lesotho such as 'Lesotho Girl Guides Association' (LGGA), 'Lesotho Correctional Services' (LCS) and 'Lesotho Association of NonFormal Education' (LANFE). These institutions or associations are affiliated with LDTC in terms of providing training of teachers, teachers' guide materials, and learners' books.

### 7.1 Enrolment

Table 7.1 portrays enrolment in non-formal education by age, level and sex in 2018. The table reveals uneven distribution of enrolment by sex in favour of males whereby males were recorded as 7,315 , or 70 percent and females 3,128 ( 30 percent). Age distribution shows that 2,389 (22.9 percent) was enrolment of learners were below 19 years and 8054 ( 77.1 percent) learners were above 18 years. The table also highlights that most learners below 18 years were enrolled under literacy and numeracy, represented by 2,061 which is 86.3 percent; it was followed by those who were pursuing secondary constituting 223 ( 9.3 percent) and primary with 105 ( 4.4 percent). Sex disparity within those aged below 19 years indicates a wide gap between males and females enrolled whereby 2,071 ( 86.7 percent) were males and 318 ( 13.3 percent) were their female counterparts. However, the gap reduced between male and female learners that were aged above 18 years, since males were 5,244 ( 65.1 percent) while females were 2,810 ( 34.9 percent).

Table 7.1: Enrolment in Non-Formal Education by Age, Level and Sex, 2018

| Total | 6741 | 1882 | 8623 | 187 | 126 | 313 | 387 | 1120 | 1507 | 7315 | 3128 | 10443 |

Table 7.2 demonstrates the enrolment of non-formal education by district, level and sex for the year 2018. Total enrolment by district reveals that the highest number of learners were in Mokhotlong and Maseru which were recorded as 2, 098 (20.0 percent) and 1,570 ( 15.0 percent), respectively. They were followed by Thaba-Tseka and Mafeteng with 1,502 (14.4 percent) and 1060 ( 10.2 percent) orderly.

The table furthermore shows that in 'Primary continuing education' under this level of education, Maseru had the highest percentage of 80.2, and it was followed by Mohale's Hoek and Mafeteng with 7.0 and 3.8 percent respectively. In 'secondary continuing education', Leribe was leading with 259 (17.2 percent) followed by Quthing and Mafeteng with 200 (13.3 percent) and 191 (12.7 percent), repectively.

Table 7.2: Enrolment in Non-Formal Education by District, Level and Sex, 2018

| DISTRICT | Literacy and Numeracy |  |  | PRIMARY |  |  | SECONDARY |  |  | TOTAL |  |  |

| MOKHOTLONG | 1842 | 70 | 1912 | 2 | 4 | 6 | 53 | 122 | 175 | 1897 | 196 | 2093 |
| THABA-TSEKA | 1098 | 320 | 1418 | 0 | 0 | 0 | 16 | 68 | 84 | 1114 | 388 | 1502 |
| Total | 6741 | 1882 | 8623 | 187 | 126 | 313 | 387 | 1120 | 1507 | 7315 | 3128 | 10443 |

With regard to Literacy and Numeracy, district comparison shows that Mokhotlong was leading with 1,912 ( 22.2 percent); it was followed by Thaba-Tseka with 1,418 (16.4 percent), and the least was Mohale's Hoek with 184 (2.1 percent).

### 7.2 Special Educational Needs

Table 7.3 displays non-formal education learners with special education needs by district, level and sex for the year 2018. Out of 10,443 learners enrolled in NFE, 267 ( 2.6 percent) learners were identified as those with special educational needs in 2018. As indicated in the table, Maseru generally topped with 90 ( 33.7 percent) students with special education while Thaba-Tseka followed with 52 ( 5.2 percent) while Mokhotlong had no learners with special education. Most learners were in Literacy and numeracy and accounted for 89.9 percent of the total enrolment of children with special educational needs. Children with special educational needs in 'continuing education' in both primary and secondary contributed only 9.1 percent. Males with special educational needs were 227 ( 85.0 percent); this number surpassed their female counterparts who were only 40 ( 15.0 percent).

Table 7.3: Non-Formal Education Learners with Special Educational Needs by District, Level and Sex, 2018

| DISTRICT | Literacy and |  |  | Primary |  |  |  | Secondary |  |  | Total |  |  |

| MOKHOTLONG | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |  |
| THABA-TSEKA | 47 | 5 | 52 | 0 | 0 | 0 | 0 | 0 | 0 | 47 | 5 | 52 |  |
| Total | 215 | 25 | 240 | 3 | 1 | 4 | 9 | 14 | 23 | 227 | 40 | 267 |  |

### 7.3 Orphan-Hood

Table 7.4 portrays orphans in non-formal education by age, level and sex in 2018. Out of the total enrolment in non-formal education,10443, 294 ( 2.8 percent) students were orphans; out of which 241 ( 82.0 percent) were male orphans while female orphans were 53 (18.0 percent). Under 'literacy and numeracy', 90.7 percent of all orphans were males, and 9.3 percent were females. For those who were in continuing education those in 'primary education' males accounted for 73.3 percent whereas among those who were in 'secondary continuing education' majority were female orphans with 61.5 percent.

Distribution of orphans by age shows that the number of orphans increased with age, thus, at younger ages there were few orphans, but as age increased the number of orphans also increased. The number of male orphans was higher than the number of female orphans in all ages in 2018.

Table 7.4: Orphans in Non-Formal Education by Age, Level and Sex, 2018

### 7.4 Teaching Staff

Table 7.5 displays teachers in non-formal education by district, level and sex for the year 2018. Maseru was leading with the number of teachers in non-formal education who were estimated at 18.7 percent, followed by Mokhotlong with 13.6 percent and the least was Quthing with 4.0 percent. Under 'Literacy and Numeracy education' Maseru was leading with 16.8 percent of teachers and was also leading in 'primary and secondary continuing education' with 34 ( 24.1 percent). The distribution of number of teachers by sex reveals inequality in favour of females, in both categories of literacy and numeracy education and continuing education with 385 ( 70.5 percent) and 161 (29.5 percent) respectively.

Table 7.5: Teachers in Non-Formal Education by District, Level and Sex, 2018

| District | Literacy and Numeracy |  |  | Primary and Secondary |  |  | Total |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | M | F | Total | M | F | Total | M | F | Total |
| BUTHA-BUTHE | 6 | 17 | 23 | 7 | 6 | 13 | 13 | 23 | 36 |
| LERIBE | 10 | 23 | 33 | 13 | 1 | 14 | 23 | 24 | 47 |
| BEREA | 14 | 41 | 55 | 1 | 4 | 5 | 15 | 45 | 60 |
| MASERU | 18 | 50 | 68 | 15 | 19 | 34 | 33 | 69 | 102 |
| MAFETENG | 11 | 35 | 46 | 6 | 8 | 14 | 17 | 43 | 60 |
| MOHALES HOEK | 0 | 9 | 9 | 6 | 8 | 14 | 6 | 17 | 23 |

| QACHAS NEK | 5 | 35 | 40 | 6 | 6 | 12 | 11 | 41 | 52 |
| MOKHOTLONG | 11 | 49 | 60 | 5 | 9 | 14 | 16 | 58 | 74 |
| THABA-TSEKA | 10 | 47 | 57 | 8 | 5 | 13 | 18 | 52 | 70 |
| Total | 88 | 317 | 405 | 73 | 68 | 141 | 161 | 385 | 546 |

Table 7.6 illustrates non-formal education teachers in continuing education by district, qualification and sex for the year 2018. It can be observed from the table that there were 405 continuing education teachers out of which 144 (35.6 percent) had primary education, 82 (20.2 percent) had Junior Certificate, 125 (30.9 percent) had COSC and 54 ( 13.3 percent) had qualifications higher than COSC such as Diplomas, Bachelor's Degree and many others.

Table 7.6: Non-Formal Education Teachers in continuing education by District, Qualification and Sex, 2018

| Total | 24 | 120 | 144 | 15 | 67 | 82 | 32 | 93 | 125 | 17 | 37 | 54 | 88 | 317 | 405 |

Table 7.7 reveals that out of total number of 400 learning posts and centres, literacy and numeracy had 384 ( 96 percent) while continuing education had only 16 ( 4 percent). Most of the literacy and numeracy learning posts were in the mountainous districts namely Mokhotlong and Thaba-Tseka. Thaba-Tseka was forefront with 60 (15.6 percent) learning posts followed by Mokhotlong with 56 (14.6 percent). Most of the districts had one 'continuing education' centre except Maseru and Berea that had 6 and 2 learning centres respectively.

Table 7.7: Number of Learning Posts/Centres in Non-Formal Education by District and Level, 2018

| DISTRICT | Literacy and Numeracy | Continuing Education | Total |
| :--- | :---: | :---: | :---: |

| Total | 384 | 16 | 400 |

## Chapter 8: Tertiary Education

### 8.0 Introduction

Beyond the previous Cambridge Overseas School Certificate (COSC) which is currently known the Lesotho General Certificate in Secondary Education (LGCSE), there are higher level institutions which are known as Tertiary or Higher Education Institutions. There are currently 15 institutions recognised by the Government of Lesotho from which nine (10) are public institutions and 5 are private institutions namely, Limkokwing, Paray School of Nursing, Maluti Adventist College (MAN), Scott Hospital School of Nursing (Scott ) Roma School of Nursing (RSN);namely they are:

1. Centre for Accounting Studies (CAS);
2. Institute of Development Management (IDM);
3. Lesotho Agricultural College (LAC);
4. Lesotho College of Education (LCE);
5. Lesotho Boston Health Alliance (LeBoHA);
6. Lesotho Institute of Public Administration and Management (LIPAM);
7. Lerotholi Polytechnic (LP);
8. National Health Training Centre (NHTC)
9. National University of Lesotho (NUL) and the private institutions comprising of:
10. Paray School of Nursing (PSN);
11. Roma School of Nursing (RSN);
12. Scott Hospital School of Nursing (Scott);
13. Limkokwing University of Creative Technology (LUCT); and
14. Maluti Adventist College (MAN)
15. BOTHO UNIVERSITY

### 8.1 Tertiary Enrolment by Institution

A total of 22,802 students were enrolled at HEIs in Lesotho in the academic year $2017 / 2018$. Out of this number 61.3 percent were females while a 38.7 percent were males. According to the table majority of the students in this level of education, were in public institutions such as NUL, LUCT, LP and LCE, where More than 80 percent of the students were enrolled in public institutions, mostly in NUL, LCE and

LP, this as has been the trend since 2014/15. Private institutions enrolled less than 20 percent of the students throughout the years as presented in Table 1.
The National University of Lesotho (NUL) has been the largest in terms of its enrolments. Enrolments by programme across all institutions indicate that most students were studying towards diploma qualifications followed by those in bachelor's degree programmes. There were 11,535 diploma students and 10,073 degree students in 2013/14. Of great concern is the fact that there are very few postgraduate programmes and students at both master's and doctoral levels.

The number of students pursuing tertiary education in Lesotho was estimated at 23,545 in $2013 / 14,58.5$ percent were females whereas 41.5 percent were males. Similar to the previous years, NUL, LCE, LUCT and LP had the largest number of students enrolled (see Figure 3). More than 80 percent of the students were enrolled in public institutions, mostly NUL, LCE and LP, as has been the trend since 2010/11. Private institutions enrolled less than 20 percent of the students throughout the years as presented in Figure 4.
